

Alberto Valiño Carro

Full-Stack PHP Developer

Dublin, Ireland · albertovcarro@gmail.com · +353 830 100 201 · albertovalinocarro.github.io · github.com/albertovalinocarro · English & Spanish (fluent)

SUMMARY

PHP developer and DBA with nine years of production PHP and MySQL at Three Ireland, most of it inside a large, long-lived codebase that other teams depend on. Hands-on across the stack: schema design and query optimisation, REST APIs, async queues, and React or Vue frontends. Recently I also wrote the Terraform and CI/CD for moving a legacy platform onto AWS. Security-minded (UCD Cybersecurity Diploma), with AI-assisted tools as part of my workflow.

EXPERIENCE

PHP Developer & DBA — Three Ireland Dublin · Jul 2017 – Present

- **Full-stack features:** owned features across Laravel + React — migrations, Eloquent models, service classes, queued jobs and React components, from spec to production.
- **API & performance:** built the REST API behind a telecom asset-management platform; modelled complex asset hierarchies, removed N+1 queries and moved report generation to Redis-backed queues, cutting page loads by ~60%.
- **Database:** resolved production performance incidents by diagnosing slow MySQL queries with EXPLAIN, composite indexes and query restructuring; moved high-volume reporting onto async queues (Laravel Queues + SQS).
- **Modernisation:** refactored legacy PHP step by step into testable, service-oriented Laravel; introduced PHPUnit suites from near-zero coverage and PR review standards, and replaced FTP deploys with containerised CI/CD.
- **Legacy audit:** catalogued 33 databases and ~21,000 files of a business-critical platform — background jobs, live payment integrations, security exposures — and wrote the audit and build-plan documentation reviewed by senior architects.
- **Infrastructure:** authored the Terraform modules (network, data, compute, pipeline) and AWS-native CI/CD for that platform's move to AWS — ECS Fargate, RDS behind an IAM-authenticated RDS Proxy, ElastiCache, KMS, blue/green deploys with rollback.
- **Security:** Sanctum/Passport authentication, role-based access via policies and gates, and API rate limiting for third-party integrators.
- **Dashboards & tools:** built a React + Laravel dashboard used daily by operations teams, introducing TypeScript, component tests and a shared design system and delivered internal tools used by cross-functional teams, including executives.
- **Data platform:** contributed to a cloud-based data platform for telecom asset management that enabled remote operations and reduced field intervention time by 30%.

Web Developer — BEUTiFi.com Dublin · Mar 2017 – Jul 2017

- PHP and JavaScript features for an early-stage beauty booking platform in a small agile team.

Web Developer — GAIAA Coruña · Sep 2015 – Feb 2016

- Full-stack PHP / JavaScript client web applications.

PROJECTS

- **Trainer Tracker — trainer-tracker.com** — solo SaaS training log in live use: Laravel REST API, PostgreSQL, Redis, SvelteKit 2 frontend; Athlete/Coach roles, training heatmap, strength progression; httpOnly-cookie token auth, rate limiting, locked CORS, Snyk scanning, auto-deploy via Docker.
- **SyncBridge (Symfony 7.4)** — multi-client webhook middleware: HMAC-SHA256 verification, idempotency checks, async processing with Messenger + Redis, outbound WMS/ERP sync, Bearer-token REST API, PHPUnit unit and functional tests.
- **Job Tracker (Vue 3 + TypeScript)** — Composition API, Pinia stores, Vue Router with auth guards, Supabase Auth and row-level security; deployed on Vercel.

SKILLS

Backend: PHP 8, Laravel, Symfony, REST APIs, OpenAPI, queues, PHPUnit / TDD, Python

Frontend: React, Next.js, Vue 3, TypeScript, JavaScript, Svelte 5 / SvelteKit 2, Tailwind CSS

Data: MySQL / MariaDB (query optimisation, indexing, data modelling), PostgreSQL, Redis

Cloud & DevOps: AWS (ECS Fargate, RDS, SQS, ElastiCache, KMS), Terraform, Docker, GitHub Actions, CodePipeline

Security & AI: authentication, RBAC, rate limiting, least-privilege IAM, dependency scanning; LLM tooling, LangChain, MCP

EDUCATION

Diploma in Cybersecurity — University College Dublin, 2024

Higher Vocational Diplomas (FP Grado Superior) in DAM & DAW — CPR A Fundación, A Coruña, 2013 – 2017
