SUMMARY

Senior full-stack developer with nine years of production PHP at Three Ireland, building applications used by 350+ people across several companies. Currently lead developer on the rebuild of a critical internal telecom platform as a Laravel application on AWS, hands-on across the architecture, the infrastructure code and delivery. Strong in Laravel, MySQL/MariaDB performance and React/Vue with TypeScript; security-minded (UCD Cybersecurity Diploma).

EXPERIENCE

Three Ireland · Dublin Jul 2017 – Present

Lead Developer, Platform Modernisation 2025 – Present

Official title: Full-Stack PHP Developer and DBA (Senior Specialist grade)

- Lead the rebuild of a critical internal telecom platform (250+ users across several companies) from a single-server raw-PHP application into a containerised Laravel 13 application on AWS; own the architecture, milestone plan, cost tracking and monthly reporting to senior management.
- Audited the legacy estate before design (33 databases, 8,000+ tables, ~21,000 files) and documented its critical security risks, which shaped the migration plan.
- Designed the architecture and wrote the infrastructure as Terraform: production isolated in its own AWS account, ECS Fargate on ARM64, RDS MariaDB and Redis in a data tier with no internet route, least-privilege IAM, KMS encryption and runtime-injected secrets, with no high or critical scan findings.
- Replaced a planned database proxy with direct TLS-verified connections, cutting the projected monthly platform cost by about 10% with no loss of security.
- Built the Docker image and AWS-native CI/CD pipeline with 17 automated gates that block any non-compliant image; brought 15 manually created resources under Terraform with no disruption; delivered the dev environment in Nov 2026, with production planned for 2027.
- Patched two critical PHP remote-code-execution vulnerabilities within 24 hours of the fix being released; work with InfoSec, platform architects and DevOps, and onboard a second maintainer.

Full-Stack PHP Developer and DBA Jun 2020 – Present

- Built the Laravel REST API behind a telecom asset-management platform (Next.js front end): complex asset hierarchies, N+1 query removal and Redis-backed report queues, cutting page loads by about 60%.
- Built React and Laravel dashboards used daily by around 100 operations users in different companies; introduced TypeScript, component tests and a shared design system.
- Implemented Sanctum/Passport authentication, role-based access and API rate limiting for third-party integrators; added PHPUnit suites from near-zero coverage.

PHP Developer and Database Administrator Jul 2017 – Jun 2020

- Maintained and extended a large PHP, JavaScript and MySQL application relied on by 250+ users across several companies.
- Resolved production incidents by diagnosing slow queries with EXPLAIN, adding composite indexes and restructuring critical reports.

Earlier roles: Web Developer, BEUTiFi.com, Dublin (Mar – Jul 2017) · Web Developer, GAIA, A Coruña (Sep 2015 – Feb 2016). Full-stack PHP and JavaScript.

PROJECTS

Trainer Tracker (trainer-tracker.com): solo SaaS in live use. Laravel API, PostgreSQL, Redis, SvelteKit, Docker auto-deploy.

SyncBridge (Symfony 7.4): webhook middleware with HMAC verification, idempotency, async Messenger and Redis, PHPUnit.

Job Tracker (Vue 3, TypeScript): Pinia, Vue Router auth guards, Supabase Auth with row-level security.

SKILLS

Backend: PHP 8, Laravel, Symfony, REST APIs, queues (Horizon), PHPUnit

Frontend: React, Next.js, Vue 3, TypeScript, JavaScript, Tailwind CSS

Data: MySQL/MariaDB (query optimisation, indexing, data modelling), PostgreSQL, Redis

Cloud and DevOps: AWS (ECS Fargate, RDS, ElastiCache, ALB, IAM, KMS, Secrets Manager, CodePipeline), Terraform, Docker, GitHub Actions

Security and ways of working: authentication, RBAC, secrets management, IaC scanning, technical leadership, AI-assisted development

EDUCATION

Diploma in Cybersecurity, University College Dublin, 2024

Higher Vocational Diplomas (FP Grado Superior), DAM and DAW, CPR A Fundación, A Coruña, 2013 – 2017
